

## Veerle Persy, MD, PhD

A physician by training, Veerle Persy obtained a Ph.D. in Medical Sciences from the University of Antwerp in 2003.

Currently a postdoctoral researcher at Antwerp University, she investigates the mechanisms of vascular calcification in the context of chronic kidney and bone disease.

In 10 years of academic research she became a published author, reviewer for several international journals, acquired expertise in obtaining government grants and gained in depth knowledge of animal experimentation and laboratory techniques.

## Hugin Mugin research

was founded in October 2007 by Veerle Persy to fulfil the research, information and communication needs of researchers, academics, physicians and pharmaceutical and life sciences companies.

## A ravenous eye for knowledge

In need of key biomedical knowledge to bring your research projects up to speed?

Hugin Mugin research has academic research experience in nephrology, cardiovascular disease, as well as bone and mineralization disorders.

Short in staff or time to delve into the literature to get started on a new research project?

Not sure which data to obtain or how to best analyse them?

Hugin Mugin research conducts feasibility studies, and provides state-of-the-art literature analysis, as well as data analysis and interpretation.

Publish or perish? And publish where?

Hugin Mugin research works with you to develop a publication strategy, to select appropriate journals so that your results get the attention they deserve. We provide writing and editing services for papers, reports, research grants, scientific posters and abstracts.

## Services

### Research and consultancy

- Strategic research planning
- Study and survey design
- Feasibility studies
- Analysis, summary and presentation of data from your research projects or surveys
- Literature search and analysis

### Writing and publication

- Publication strategy development
- Preparing papers for publication in scientific journals
- Report writing and/or editing
- Assistance in writing grants or research proposals
- Scientific abstracts

### Presentation

- Scientific posters
- Powerpoint presentations
- Slide kits

## Our approach

We analyse and structure your research needs, provide a solid project proposal with clear deliverables and complete the work in a professional and timely manner. Working from a strong medical and scientific background, with an analytical mind and attention to detail, Hugin Mugin research provides the customised analysis, advice and reporting you need to get the most out of your research data.

### *The ravens: Hugin and Mugin*

*Hugin and Mugin (or Munin) are the ravens of the Norse God Odin, whose names mean 'thought' and 'memory'. Odin sends them out at dawn to fly all over the world and when they return, they sit on his shoulder and speak into his ear all the news they gathered.*

Analogous to our mythological namesakes, Hugin Mugin research

- scouts for excellent scientific and medical information
- works with you to organise your thoughts into a clear-cut research or publication strategy
- enhances the memory of your research with comprehensive reports, articles or presentations.

Hugin Mugin Research provides the biomedical research, consulting and writing services you need.
